

Two focused practices for clearly defined federal requirements.

InterestCorp, LLC provides federal agencies with commercial product sourcing and fulfillment—with an emphasis on American-made products—for MRO, material-handling, packaging, hardware, furniture, and facility requirements; and custom software development and systems-design services for clearly defined digital projects.

PRACTICE 01

Product Supply & Fulfillment

Requirement-driven coordination from American-made and broader commercial sourcing through delivery and verification.

- American-made product sourcing when required or preferred
- Commercial product sourcing
- Supplier and price coordination
- Packaging and order consolidation
- Freight and delivery management
- Receiving and quality verification
- Furniture, MRO, hardware, tools, packaging, material-handling, and facility supplies

PRACTICE 02

Software & Digital Systems

Fixed-scope digital deliverables with defined users, workflows, interfaces, and acceptance criteria.

- Custom web and database-backed applications
- Workflow automation and internal business tools
- Data dashboards
- API and systems integration
- Modernization of small legacy workflows
- Testing, documentation, deployment, and maintenance

DELIVERY MODEL

InterestCorp is owner-led. The company scales delivery through qualified independent contractors and organizational subcontractors selected for the specific requirements of each engagement. Resource availability is confirmed before commitment, and key-personnel experience is identified separately from company past performance.

Use the focused statement that matches the requirement.
