

American-made product sourcing coordinated through delivery.

InterestCorp specializes in sourcing American-made products for defined federal supply requirements while coordinating broader commercial items when permitted.

CORE CAPABILITIES

- **American-made product sourcing**
Prioritize U.S. manufacturers and domestic suppliers; verify origin representations and supporting documents for the quoted item.
- **Commercial product sourcing**
Match documented specifications, quantities, lead times, and delivery conditions.
- **Supplier and price coordination**
Coordinate availability, pricing, alternatives, and purchase details.
- **Packaging and order consolidation**
Organize multi-item or multi-supplier requirements into a clear fulfillment plan.
- **Freight and delivery management**
Coordinate routing, carrier handoffs, timing, documentation, and destination requirements.
- **Receiving and quality verification**
Confirm item condition, quantities, and agreed acceptance details.

PRODUCT CATEGORIES

- Furniture
- MRO and facility supplies
- Material-handling equipment
- Hardware and tools
- Packaging products
- Requirement-specific commercial items

REQUIREMENT INPUTS

- Specifications and acceptable equivalents
- Quantities and packaging needs
- Delivery location and required date
- American-made, origin, and domestic-preference requirements
- Inspection and documentation expectations

EXECUTION PATHWAY

01**Define**

Confirm items, quantities, constraints, and acceptance.

02**Source**

Coordinate suppliers, pricing, availability, and alternatives.

03**Deliver**

Manage consolidation, freight, handoffs, and destination needs.

04**Verify**

Document quantities, condition, and requirement-specific checks.

PRECISE OPERATING MODEL

InterestCorp coordinates requirement-specific suppliers, carriers, and receiving controls. American-made status is verified at the quoted-item level; InterestCorp does not imply that every available product is domestic or that one origin representation satisfies every acquisition rule.
